Evening Times

Petition for presumed consent for organ donation

THOUSANDS of people die needlessly every year because only 30% of the British public have signed up to the national organ donor register. A change to a presumed consent system in Scotland - with the option to 'opt out' - would greatly increase the availability of healthy donor organs, transforming the lives of countless patients. We need YOUR help to make this happen and save more lives. Sign our petition to support an 'opt out' system of organ donation.

We, the undersigned, would like the organ donor system to be changed so that consent is presumed unless a person specifically opts out.

Name	Email (optional)	Nationality	Address	Postcode	Country	Signature
